📚 Education

Guru Gobind Singh Indraprastha University, Delhi

Computer Science Engineering. CGP - 7.6

2023-2027

Coursework: Data Structures/Algorithms, Data Science, Artificial Intelligence, Statistics/Probability, Java, C++, Web Development, Software Development, MLOPS

💼 Experience

Techno Hacks Solutions

Nashik, Maharashtra

DevOps Engineer

Mar 2025–Apr 2025

- Spearheaded containerization efforts using Docker to streamline application deployment and scalability..
- Collaborated with development and QA teams to integrate containers into DevOps workflows.
- Optimized Docker images, reducing deployment time by 5% and improving server efficiency.

Devliqly

Greater Noida, UP

Frontend Developer

Feb 2025–July 2025

Developed responsive UIs using React.js and managed global state with Redux Toolkit, improving application load speed.

👋 Skills

- 👍 **Expert:** Python (Pandas), Git/Terminal, Frontend, WordPress, Excel, HTML /CSS, SEO, Management
- 👉 **Intermediate:** Java, C++ (oops), AWS, DevOps, Containerization, Power BI, MobaX, N8N

🏆 Certificate and Achievement

TCS iON Career Edge - Young Professional; C Id- 119854-7522980-1016

issued DEC 2024

Modernize Infrastructure Applications with Google Cloud, C ID:- 7714063

issued DEC 2024

Gates Foundation Case Competition, Finalist

Nov 2024

Hackathon's participation certificates,

Bidding war winner In Event of Ecell, winner

Nov 2024

📄 Project

Blockchain voting system

Web3 Development

- **Secure Voting:** Created a voting app where votes cannot be deleted because they are stored on a **Blockchain**
- **Smart Contracts:** Wrote the core logic using **Solidity** and **Truffle** for counting process without a middleman.
- **Safe Login:** Used **MetaMask** so users can log in securely using their Ethereum wallet instead of a password..

Multi-Agent Credit Risk & Loan Approval System

AI Engineering (FinTech)

- **Multi-Agent Orchestration:** Engineered a collaborative AI system using **LangGraph** where specialized agents automate credit risk assessment and loan.
- **Regulatory RAG:** Integrated **Retrieval-Augmented Generation (RAG)** via **ChromaDB** to ensure real-time adherence to 2026 lending policies..
- **Tech Stack:** Built a professional dashboard using **Streamlit**, **Python**, modular API integration
- **Explainable AI (XAI):** Developed "Reasoning Trace" to provide transparent, step-by-step logs of agent decisions
